

Post-operative Instructions Sheet

Yag Capsulotomy

- Do continue to use any previously prescribed eye drops in both eyes.
- Use Lotemax or Flarex 1 drop to the operative eye 4 times a day for 4 days.
- It is quite common to experience an increase in floaters after the laser treatment. These typically subside within a few days to weeks.
- If you have increasing pain and/or redness to the eye after the laser, please notify the office.
- Please be sure to keep your scheduled post-operative appointment.
